

Other self-cleaning glass

SGG BIOCLEAN®

Which would you prefer?

SGG **BIOCLEAN®** - One less chore in life.

This dual-action self-cleaning glass is considerably more neutral than others of its kind, making it the clear choice.

SAINT-GOBAIN
GLASS

Why choose SGG BIOCLEAN self-cleaning glass?

- Uses UV light and rain to break down organic dirt and wash it clean away
- Windows stay cleaner for longer, saving you time and money on window cleaning
- The most neutral self-cleaning glass available
- No unsightly tint or unattractive reflective surface
- Permanent self-cleaning coating lasts the lifetime of the window
- Now available with a solar control coating for cooler interiors
- Ideal for windows and hard to reach areas such as conservatory roofs or high-level glazing
- Stubborn marks are easier to clean, even without detergents
- Widely available across the UK
- For more information visit www.selfcleaningglass.com or email your enquiry to bioclean@saint-gobain-glass.com
